WHEN IMAGE MATTERS

WHEN IMAGE MATTERS

In minutes, VIS-Polish makes road-wear rims shine like new.

About VIS-Polish

VIS-Polish is an aluminum wheel refurbishing system. Simply install the wheel to be refurbished or polished (tire-on or tire-off), start VIS-Polish and walk away. Fully automated, VIS-Polish enhances:

- Safety** VIS-Polish uncovers hidden wheel damage. The enclosure contains the dirty refurbishing process.
- Quality** VIS-Polish produces a deeper, longer lasting shine than manual or 'semi-automatic' polishing.
- Speed** VIS-Polish is faster than manual polishing and it never takes a break.
- Cost** VIS-Polish reduces polishing costs and increases margins by reducing manual labor.
- Control** VIS-Polish minimizes potential wheel damage by applying perfect motion and pressure every time.

The VIS-Polish Journey

Before

Dirty, road-wear wheels look bad and can hide dangerous wheel damage.

Touchscreen Controls

PLC interface and automated cycles give total control over the process, with exclusive sectional sanding to improve cycle time and wheel finish.

Tire-on or Tire-off

VIS-Polish quickly refurbishes wheel surface to reveal the smooth surface beneath the damage and road grime.

Cut, Color & Shine

In minutes, VIS-Polish will cut, color and shine aluminum wheels to a deep, long lasting mirror finish. Compound application, speed and pressure are perfect, every time.

After

Image always matters. Well cared for wheels are a reflection of a safe, well cared for vehicle.

Eliminate Dangerous Manual Processes

Take control of a messy, loud and even dangerous job. VIS-Polish contains the dirt, dust and noise of aluminum wheel polishing in a sturdy, attractive work cell. Operator involvement is limited to loading the machine, changing sanding and polishing media and initiating the PLC controlled robotic polisher.

VIS-Polish Specifications

Electrical	480/3/60
Current	20 Amp
Power	5.2 kW
Weight lb	3,300
kg	1,500

About VIS:
Since 1994, VIS has specialized in the innovation of workplace automation in heavy vehicle service shops. By automating vehicle inspection and servicing, VIS customers achieve higher customer satisfaction and profitability from existing operations.
