Additional VIS Information	6

For more than 25 years, Vehicle Inspection Systems {VIS} has been the front runner for heavy duty vehicle, truck, and bus safety in the trucking and transportation industry. VIS specializes in brake and undercarriage inspection as well as wheel and rim safety.

Inside you will find products for use with the VIS-Polish as well as tools and supplies for hand polishing, buffing and wheel prep. We hope that you will see how our products can offer solutions to your problems and ensure your wheels come out looking as amazing as possible.

Sincerely,  
The VIS Team

# Flap Wheels

## New and improved 6" flap wheels

VIS developed our brand new flap wheels after extensive research, development and testing. Our new family of flap wheels range from 60-320 grit. VIS Flap wheels are made in the USA by VIS.

-  Superior material leads to improved durability
-  Lower consumable cost per rim when sanding
-  Precise, engineered construction ensures reliable performance while minimizing equipment wear and tear; also features a locking ring for added security
-  Unique injection molded hub designed to minimize flap separation and ensure accurate balance of flap wheels
-  Consistent weight, prevents out of balance issues or premature wear of buff spindles
-  Redesigned hub- new 6" hub diameter combines the smooth running of the 5" hub with 8" hubs

Customers have been raving about the savings, improved performance and durability of the new flap wheels.

# Consumables

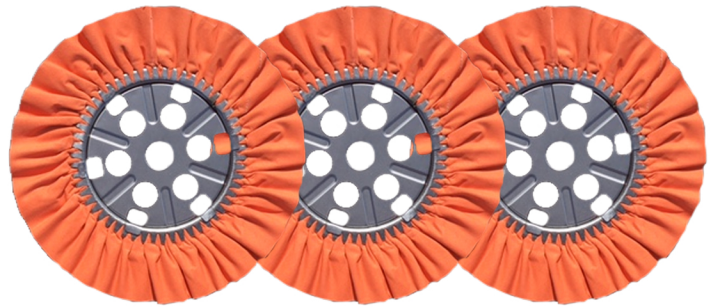

## Bufs, rouge bars & more

### Product List

## Consumables Catalog

"Best money  
spent on these tools.  
Good people, excellent  
products."

-Neil M., Canada

"Quality!  
Improvements in  
engineering and software are a  
constant...and a technician is only a  
phone call away. The product is  
amazing and customer satisfaction  
is very high."

- Dave R., IA

"I do like the  
service that I get with  
ordering supplies and the  
professionalism of the service  
techs when they are on my  
site."

-John Q., NC
